

.dotfiles

These are my personal dotfiles.

Main tools I am currently using are:

- urxvt
- byobu
- vim
- i3-gaps
- ranger
- rofi

Getting started

Todo

Font setup

Since we use a powerline font we need to install the necessary fonts.

```
1 git clone https://github.com/powerline/fonts.git --depth=1
2 ./fonts/install.sh
3 rm -rf fonts/
```

Installing the dotfiles

To deploy the .dotfiles we use the tool stow.

```
1 git clone https://github.com/TuDatTr/dotfiles .dotfiles && cd .dotfiles
2 stow vim
3 stow zsh
4 stow config
5 sudo ln -s $HOME/.scripts/pipes.sh /usr/local/bin/pipes
```
